SKILLS

- **Spanish:** Native speaker
- **English:** C1
- **Cloud & DevOps:** GCP (Services core, ETL/Data Workflows, Terraform), Linux, Docker/Kubernetes
- **Data & Databases:** SQL (MySQL, PostgreSQL, SQL server), Knowledge in AI Agent Architecture.
- **Coding:** (HTML/CSS/JS/Node/React/Python/Git/Github)
- Knowledge of On-Premises Network Environments.
- Admin and Managing Google Workspace Suite.
- Building No-Code Apps with AppSheet.
- Baseline knowledge in Microsoft 365.

ABOUT ME

Cloud Certified Solutions Architect with 4 years of experience leading technical sales and presales efforts. Strong expertise in GCP infrastructure migration, design and implementation of Data Engineering pipelines, and security solutions architecture. Proven ability to translate technical requirements into value propositions with a focus on consumption optimization (FinOps), facilitating deal closure and revenue growth within the Cloud ecosystem.

CERTIFICATIONS

- [Professional Data Engineer](#) (Google Official Certification).
- [Professional Cloud Security Engineer](#) (Google Official Certification).
- [Cloud Digital Leader](#) (Google Official Certification).
- [Professional Cloud Architect](#) (Google Official Certification).
- [Generative AI Leader](#) (Google Official Certification).
- [Associate Cloud Engineer](#) (Google Official Certification).

WORK EXPERIENCE

XERTICA.AI

- Customer Engineer

[Jun/2026 – Present](#)

- Developed and delivered hands-on technical Proof of Concepts (PoCs) and live interactive demonstrations, validating architectural feasibility and showcasing concrete platform capabilities to client decision-makers.
- Drove technical discovery, architectural scoping, and solution design across Xertica's core business units, including Google Workspace, Cloud Infrastructure, Data Engineering, Security, and AI platforms.
- Partnered closely with sales teams on daily opportunities, unblocking technical objections, validating requirements, and positioning appropriate cloud solutions to advance deals through the sales pipeline.

SERVINFORMACIÓN

- Technical Sales Leader México

[Nov/2024 – Apr/2026 | 1+ Years](#)

- Drove a 38% increase in annual business utility by leading the technical strategy and crafting high-value proposals for Data, Infrastructure, and AI projects on Google Cloud Platform.
- Expanded the portfolio footprint in key accounts, generating ≈ \$260k+ in upsell revenue by proactively identifying modernization opportunities (e.g., migrations to BigQuery) leveraging deep industry analysis
- Increased the deal closure rate by 10% by redesigning technical demonstrations to focus on specific business outcomes rather than just feature sets, directly influencing C-Level decision-making

- Presales Engineer

[Jan/2024 – Nov/2024 | 1 Year](#)

- Driven the technical presales strategy for Corporate and SMB segments, achieving a 42% increase in annual utility for the presales department.
- Accelerated the sales cycle by ≈ 40% through the execution of efficient technical discovery sessions and high-impact Proofs of Concept (PoCs) that validated feasibility faster.

- Managed a technical opportunity pipeline valued at over \$ 380K USD, collaborating closely with sales teams to unblock complex technical objections in negotiations.
- Architected and defended over 80+ custom technical proposals (Infra, Data, Analytics), achieving a 20% win rate by aligning GCP solutions with specific client ROI targets.

XERTICA.AI

- Cloud Analyst

Jan/2023 – Dec/2023 | 1 Year

- Designing and deploying cloud infrastructure for new customers and architectures (Infra, and Monitoring Services).
- Optimized cloud resource allocation for 15+ enterprise, corporate and SMB architectures, achieving an average of 10-15% reduction in monthly billing through FinOps best practices and right-sizing initiatives.
- Automated infrastructure provisioning using Terraform and Jenkins scripts, reducing manual deployment times by 30% and ensuring 100% consistency across development and production environments
- Fortified cloud security posture by integrating Identity and Access Management (IAM) and security best practices into every deployment, reducing potential vulnerability surface for new customers.

- Academy Infra

Feb/2022 – Jan/2023 | 1 Year

- Streamlined the onboarding of 20+ new cloud projects by provisioning core Google Cloud services (Compute Engine, VPC, Cloud Storage) with a focus on high availability and scalability
- Reduced resolution time for technical incidents by managing the customer support ticket lifecycle for core GCP services, ensuring consistent follow-up and high satisfaction rates.
- Developed a comprehensive library of 20+ technical architecture documents, standardizing the deployment process and improving internal knowledge transfer across the engineering team.
- Led technical knowledge transfer sessions for clients post-implementation, empowering their internal teams to manage GCP environments effectively

EDUCATION

Bachelor's Computer Science, 2022

Unidad Profesional Interdisciplinaria de Ingeniería y Ciencias

Sociales y Administrativas - CDMX

UPIICSA - IPN
